(54) Title: METHOD OF AND EQUIPMENT FOR CREDIT MANAGEMENT FOR ACCESS IN A TELECOMMUNICATIONS NETWORK

(57) Abstract: This invention describes a method for carrying out forced booking of reserved credits for the credit management of prepaid accounts within a multi service telecommunications environment. This method can be used in a multi service telecommunications environment (1), wherein a credit management system (8) is in communicative connection with a number of service provisioning systems (3-7), using a telecommunications network (2) and where at least one user of an account can access the network by both mobile and fixed access means (10, 11, 13), characterized in that the credit management system (8) is arranged for carrying out a forced booking in order to update account balance information.
